**Objective and Investment Policy**

- **AZ Swiss & Partners S.A.** is the Investment Manager of this Sub-fund
- The aim of the Sub-Fund is to achieve higher returns than euro bond market investing in debt instruments not in euro currency and seeking capital appreciation also from the exchange rate performance;
- Through discretionary choices, the Sub-Fund invests primarily in bonds, both fixed and floating rates, issued in currencies other than Euro by Government, Supranational and company issuers;
- At least 70% of the assets will be invested in securities with minimum rating A-;
- Exposure to a single currency may not exceed 50% of the net assets unless the currency is other than USD, GBP, JPY, AUD and CAD in which case the percentage is limited to 25%;
- Derivative instruments, which are financial contracts whose value depends on the market price of a reference asset, can also be used for investment purposes provided that the total commitment does not exceed, at any moment, 50% of the net asset value of the Sub-Fund; the investment in credit derivative instruments (i.e..Credit Default Swaps, Credit Spread Derivatives that allow two parties to exchange the credit risks specific to some issuers) is allowed only for hedging purposes;
- A wide degree of discretion is allowed with respect to the **benchmark** which is made of:
  - 60% BOFA Merrill Lynch 1-3 Year Global Government Excluding Euro Governments Index in LOC (N1Q1 Index)
  - 40% BOFA Merrill Lynch 3-5 Year Global Government Excluding Euro Governments Index in LOC (N2Q1 Index)

**Risk and Reward Profile**

- The risk category is based on a synthetic indicator linked to historical data over a 5-year period and is not a reliable indication about the future risk profile of this class of shares; it is not guaranteed and it may change over time;
- The Sub-Fund has been launched in December 2014 so, without historical performance, the risk category was set at 3 on the basis of the medium-low volatility of the benchmark;
- The lowest rating does not mean a risk-free investment;
- This Sub-Fund is not a guaranteed capital fund and the following **risks**, though not detected by the synthetic indicator, can be relevant for the Sub-Fund:
  - Significant changes in interest rates may cause large fluctuations in bonds;
  - Fluctuations in currency exchange rates can negatively affect the return of the investment.
  - Derivative instruments can be used to increase, limit or keep the risk level of the Sub-Fund. The strategy implemented by the Manager may not always be successful and the Sub-Fund could therefore incur in significant losses;
  - The use of derivatives, especially OTC (meaning that they are not traded in regulated markets but directly with the counterparties) may imply significant losses if a counterparty defaults and cannot honor its liabilities;
