Euro Equities - "L"

A Sub-Fund of New Millennium

"Capitalization" shares (ISIN LU1148873406)

This SICAV is managed by **NATAM Management Company S.A.**

Objective and Investment Policy

- **Banca Finnat Euramerica S.p.A.** is the Investment Manager of the Sub-fund;
- The aim of the Sub-Fund is to provide real capital growth deriving from the economic development of the countries in which it invests;
- Through discretionary decisions, the Sub-Fund mainly invests in transferable securities such as equities, convertible bonds and warrants on transferable securities mainly issued by large capitalization companies; such securities are denominated in Euros and included in the main European indexes. Warrants are securities that entitle the holder to buy the underlying stock of the issuing company at a fixed exercise price until the expiry date;
- The investment strategy is based on keeping a sector exposure which replicates that of the benchmark and on implementing further rules aimed at reducing risks;
- A wide degree of discretion is allowed with respect to the **benchmark** which is made of:
 - 95% MSCI EMU TOP TR
 - 5% Bloomberg Barclays 3M Euribor TR (BC3MTREU)
- Derivative instruments, which are financial contracts whose value depends on the market price of a reference asset, can be used also for investment purposes provided that the total commitment does not exceed 50% of the net asset value;
- Investors may trade their shares on any business day for Luxembourg banks provided that the stock exchange in which the shares are tradable is open for trading and that it is possible to cope with the orders
- All income is, normally, reinvested.

Risk and Reward Profile

- The risk category is based on a synthetic indicator linked to historical data over a 5-year period and is not a reliable indication about the future risk profile of this class of shares; it is not guaranteed and it may change over time;
- The risk indicator for this class of shares is set at 6 because the volatility of its past returns has been high; this is mainly due to the prevalent investment in equity markets;
- The lowest rating does not mean a risk-free investment;
- The calculation for this share class, for the period prior to its launch, was made on the basis of the data of Class "A" which, being a pre-existing class of shares, has a long enough track record to make the calculation meaningful;
- This Sub-Fund is not a guaranteed capital fund and the following **risks**, though not detected by the synthetic indicator, can be relevant for the Sub-Fund:
 - The value of the investment may rise as well as fall significantly and it is possible to receive less than originally invested;
 - The value of equities, in particular, may change significantly;
 - Derivative instruments can be used to increase, limit or keep the risk level of the Sub-Fund. The strategy implemented by the Manager may not always be successful and the Sub-Fund could therefore incur in significant losses;
